Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Applicant's election without traverse of the species CMV promoter in the reply filed on 8 January 2008 is acknowledged.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7, 21 and 22 stand rejected under 35 U.S.C. 102(b) as being anticipated by Gallatin et al. (A, newly cited) for reasons of record set forth in the previous Office Action.

At page 9 of the amendment filed 20 October 2008, Applicants argue that "Gallatin does not anticipate the claims because the cited document does not teach screening a library of vectors for a member that has a desired activity, nor does it teach the use of a reporter protein that affects or regulates a biological process in a cell." However, as set forth in the previous Office Action, both elements are taught by Gallatin et al.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 3, 4, 6, 8-12, 14-19, 23 and 24 stand, and newly added 25-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gallatin et al. (A) in view of Hillman et al. (B) for reasons of record set forth in the previous Office Action.

At page 10 Applicants refer to the alleged deficiencies of the Gallatin et al. reference, which are addressed above, stating that Hillman et al. does not remedy them, and then Applicants merely state that the invention would not have been obvious, citing no further reasoning. However, the reasoning was made of record in the previous Office Action.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4 and 5 stand, and 14, 21 and 22 are newly rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention, for reasons of record set forth in the previous Office Action.

With respect to claims 4 and 5, at page 11, Applicants argue that the insertion of generic terminology along with the renders the rejection moot. However, in view of MPEP §2173.05(u), the use of both the trademark and the generic description would appear to be unnecessary. Indeed, the generic description should be sufficient, and if the nature of the material associated with the trademark changes in the future, the actual scope of the claims will become unclear.

With respect to claims 14, 21 and 22, these claims now depend from cancelled claims due to the amendment.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
